SETUP GUIDE

SCAN HERE FOR VIDEO GUIDE

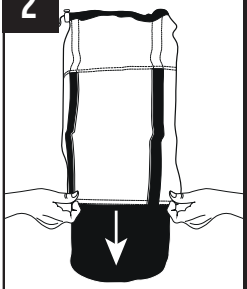

1

Fill your fabric pot with your grow media of choice.

DO NOT pot up your plant at this stage.

2

Slide the FlexiGrow Cover over the top of your filled fabric pot - BEFORE potting up your plant.

3

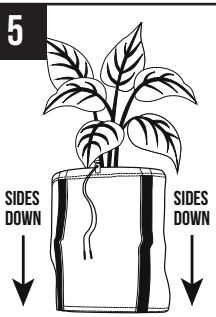

Now pot up your plant.

4

Pull the toggle on the drawstring to close the FlexiGrow Cover around the stem of your plant.

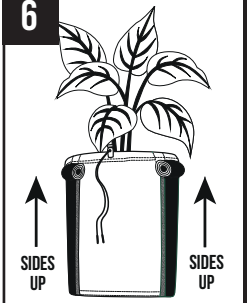

5

High Hummidity

Keep the sides of the FlexiGrow Cover closed - secured by the vertical black velcro strips.

6

Low Hummidity

Open the sides of the FlexiGrow Cover (partially or fully) by undoing the vertical black velcro strips and rolling up the silver material. The velocro will hold rolled up sides in place
